

Postal & Parcel Logistics

Reusable Transport solution for High-Volume Parcel Networks

Industry

Postal & Parcel Logistics – Nordic Region.

Customer Profile

A leading Nordic postal and parcel operator managing high-volume, cross-border parcel flows for e-commerce, retail, and business customers. The organisation continuously invests in innovation to improve efficiency and reduce environmental impact across its logistics network.

The Challenge

The existing transport solution no longer meets operational and sustainability requirements. The customer needed a more flexible, durable, and reusable solution that could support intensive daily use across multiple countries.

The Solution

LC Packaging developed a customised FlexiBox solution tailored to postal and parcel logistics. Designed for frequent handling and seamless integration into existing operations, FlexiBox provides a robust, reusable alternative to conventional transport packaging.

The Result

After successful pilot trials, FlexiBox was approved for multi-market rollouts and is now used in daily parcel operations across several Nordic countries.

Key Benefits

- Reduced single-use packaging
- Improved handling efficiency and durability
- Scalable solution for cross-border logistics
- Supports circular and sustainable supply chains

Why FlexiBox

FlexiBox enables postal and parcel operators to combine operational performance, flexibility, and sustainability in one reusable transport solution.
