

MEAT BAG

The ultimate solution
for your meat transport

MEAT BAG

the ultimate solution for your meat transport

Reduce your logistics costs, increase your efficiency and improve your hygiene by using Meat Bags!

Our Meat Bags are a revolutionary alternative for the cardboard boxes and plastic crates that are often used during treatment, transport and storage of meat.

1 Lower logistics costs

- › No return costs
- › Reduced risk of damage or theft
- › Saves space when empty
- › No cleaning costs
- › Easy and fast application

2 Tailored to your activities

- › Tailor made
- › 100% waterproof LDPE liner (optional)
- › Printing on 4 sides in 4 colours (optional)
- › Capacity up to 1000 kg
- › Ideal for fresh/frozen meat and sharp pieces

3 Improved hygiene during transport

- › Food Clean if required
- › Used in combination with plastic pallets
- › Suitable for food contact according to FSSC 22000 requirements

Current packaging solutions: the disadvantages

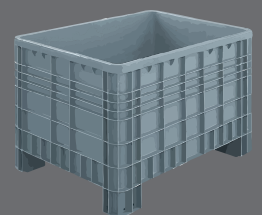

Cardboard ★★☆☆☆

Low moisture resistance
Voluminous, full as well as empty (octabin shape)

Plastic crate ★★☆☆☆

High initial investment
Voluminous, full as well as empty
Cleaning required before re-use
High return costs
Risk of damage or theft

Committed

Reliable

Loyal

Our Industries

Edible meat

Meat processing

Poultry

keeps your industry going

LC Packaging has its own Food Clean production facility, with FSSC 22000 certification. Our storage locations are BRC certified for storage and distribution. All Food Clean Big Bags can be delivered with a Documentation of Compliance (DoC) for food contact.
