Our FIBCs, your benefits

www.lcpackaging.com

**Efficient, safe and
of excellent quality**

02

A proven track record in supplying companies in the construction industry

With the right big bags, the transportation and movement of sand, gravel mortar, stones and cement becomes more efficient and cost effective. Are you looking for big bags of excellent quality? We can provide you with high quality big bags that are tailored to your specific needs.

Benefit from our expertise in packaging for your industry.

Our leading expertise in the construction industry

We provide excellent quality FIBCs. All our bags are independently tested, safe and durable. We supply FIBCs to an extensive customer base in the construction and gardening industry. Our goal is to contribute to high confidence in operations safety and efficiency. Our bags comply with all required quality regulations and our customers receive the best service from our packaging experts.

High efficiency during filling, transportation, storage and loading

Excellent quality, superior protection

Own FIBC production facilities

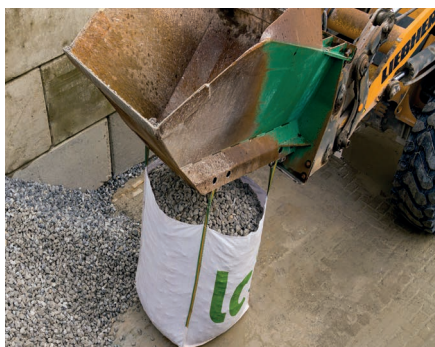

Local service, advice and storage

Sustainability throughout the chain

Tailor-made FIBCs that conform to your marketing purposes

High efficiency during filling, transportation, storage and unloading

- Save on valuable warehouse spacing: empty big bags are low-weight and space-saving
- Easy to handle: a large selection of loops for effortless mechanical filling
- Special spouts for controlled discharging without spilling
- Possibility to pile up full big bags
- No need for secondary packaging

04

Local service, advice and storage

Do you need big bags, advice or service? We are always close by!

Standard sizes (1 m³, 1/2 m³, 1/3 m³) are available from stock. In order to arrive at the best solution together, we are happy to provide you with technical advice on site. Our sales and service team is ready for you!

Excellent quality, superior protection

Our big bags are produced and tested according the highest standards and are certified by external certification bodies. To make sure that safety risks for humans and for the environment are minimized, all applicable rules and regulations are adhered to. We offer UN big bags for the transport of dangerous waste.

The more sustainable option: FIBCs with recycled material

More sustainable material, the same familiar quality: discover our FIBCs with 30% Post-Consumer recycled material (**rPP-PCR**).

This material comes from used big bags and polypropylene bags. **Our rPP-PCR Big Bags are just as strong and secure as the familiar LC Big Bags.**

At Royal LC Packaging, our ambition is to contribute to a world without waste. The transition towards more sustainable products is an important step in this direction.

Read more about our 2030 Ambition at 2030ambition.lcpackaging.com.

Own FIBC production facilities

With our own certified production facilities, we have full control over our big bag production.

This results in high product quality and safety, flexible production, quick and timely deliveries and a safe and healthy work environment that ensures the wellbeing of our employees.

06

Tailor-made FIBCs that conform to your marketing purposes

Experience the benefits for tailor-made big bags for your process and your market!

- Various loop types (standard, cross-corner, tunnel), in any color
- Different fabric colors
- Numerous filling and discharging options
- Company name or logo can be printed on four sides of the big bag

Why LC
